Revolutionizing the Future of Education: Innovative Practices of the Kalorex Group

Kajal | Business Connect

“The true end of education is not only to make the young learn, but to make them love learning, not only to make them industrious, but to make them love industry, not only to make them virtuous, but to make them love virtue, not only to make them just but to make them hunger and thirst after justice.”

The future of education in India is poised for significant transformation with the increasing adoption of technology and digital platforms. Online learning has become more prevalent, especially in the wake of the COVID-19 pandemic, and is likely to continue to grow in popularity. Moreover, emerging technologies like virtual and augmented reality, artificial intelligence, and block chain technology have the potential to revolutionize the way education is delivered, making it more personalized and accessible to learners. Additionally, the focus on vocational and skill-based training is expected to increase, as the demand for job-ready graduates in the market continues to rise. In summary, the future of education in India looks bright, focusing on technology, innovation, and practical training.

In this context, our editorial team had an interesting and joyful virtual session with the leadership team of the Kalorex Group. The management of the company and the MD & CEO, Dr. Manjula Pooja Shroff, shared numerous lesser-known facts about the company and also shed some light on her overall entrepreneurial journey so far. Her passion and dedication to the Education industry highly inspired us and made us feature her on the cover of this exclusive volume. We truly hope and desire that this fascinating read will add some extra value to the lives of our global readership panel and surely encourage the budding leaders out there to break the barriers and chase their dreams.

COMPANY PREFACE

Giving a detailed introduction of the company, Dr. Manjula quips, “There have been myriad institutions that have come up catering to various needs of students. The Kalorex Future Schools set up in Ahmedabad and Mundra and the Calorx Public School in Bharuch cater to the needs of all economic groups of students and run under the CBSE boards. The Calorx Olive International School is a full-spectrum IB school under Kalorex management. The Kalorex Pre-Schools are also expanding and have developed a unique and innovative curriculum based on an amalgamation of students’ learning styles and needs which makes learning easy and fun. Kalorex Prema and Visamo Kids Foundation work tirelessly towards catering to the needs of the special needs and underprivileged students respectively whereas the Vocational & Educational Institute of Calorx(Vedix) trains destitute women for vocational purposes.”
